e) Each lot must have a buildable area as defined by this ordinance and established in section 400 of this code. This does not require that a house pad occupy the entire buildable area. Each lot must comply with the following:

a. The buildable area must be designated by the applicant and approved by the city council at the time of the subdivision creating the lot. For pre-existing lots, the buildable area will be designated by the city planner based on the standards contained in this ordinance and section 400 of this code.

b. The city may require that construction within the buildable area be located where the city determines it would reasonably:

i. minimize the amount of adverse impacts to the physical environment on the lot, including such things as significant trees, grading, erosion, and surface water drainage, and

ii. be consistent with the location of the structures in the surrounding neighborhood.

c. No principal structure, or any portion of it, may be located outside the buildable area, except when intrusions into setbacks are allowed by this code.

d. If a home exists on a lot with less than the minimum buildable area, the home may be enlarged or rebuilt within the applicable setbacks without a variance from the buildable area standard.

1) the sales occur during no more than two periods of a maximum of three consecutive days each in any 12-month period,
