## 2025 Post-Election Review

### Discrepancies between reported and hand-counted totals

At-Large Seat B

Ward-4 Precinct-B

**One ballot ruled for David D. Biesboer which had been originally tabulated as Write-In.**

1. Bubble filled in for Write-In, but name written in was “David Biesboer”;

#### Common examples of discrepancies [how the ballot was counted vs. voter intent]:

- Marked very lightly; not enough bubble filled to be detected by the ballot counter.
- Mark made outside the bubble; could not be detected by the ballot counter.
- “X” marked slightly outside the bubble; not enough bubble filled to be detected by the ballot counter.
- Name written in the write-in area but bubble not filled in; could not be detected by the ballot counter.
- “✓” used and marked slightly outside the bubble; not enough bubble filled to be detected by the ballot counter.
- Bubble for *[candidate 1]* filled in, and bubble for *[candidate 2]* filled in and was scribbled over/crossed out; ballot counter detected an overvote.
